For professional advisers only

Greenbank provide ethical and sustainable investment services for private clients, charities, trustees, institutions and professional partners. We are one of the most experienced teams in the sustainable investment field and have been helping to drive change through ethical and sustainable investment for more than 20 years.

Our in-house ethical, sustainable and impact (ESI) research team is one of our core strengths, and our active approach to engagement with companies complements our investment analysis.

We strive to be the natural home for those who want to align their investments with the change they want to see in the world. We provide sustainable investment as standard, not as an add on.

Greenbank was created by people passionate about the use of finance as a force for good and we share this passion with our clients. Our team continues to grow, with people who share our vision.

Our Managed service has been designed to meet the needs of your clients who want access to an ethical and sustainable portfolio within a fund structure.

There are five ready-made ethical and sustainable investment solutions with a broad spectrum of financial objectives and risk appetites, for clients with £150,000 and above to invest.

Four of the Managed Strategies (2-5) are invested in Rathbone Greenbank's actively managed multi-asset funds, with Strategy 6 invested in a single strategy fund (Rathbone Greenbank Global Sustainability fund).
